

Devor 40P

Powered concert subwoofer

The DEVOR 40 is a high performance horn loaded subwoofer system with two 8" studio grade drivers. It provides a low frequency response with very low distortion and a fast impulse response where sound quality is prioritized over sound pressure level. The horn design provides high quality audio reproduction down to 40Hz. It has a sub-cardioid dispersion pattern throughout the frequency range. This allows the sound pressure to be directed towards the audience, and minimizes the need for acoustical treatment of the room, as very little energy is reflected off surrounding surfaces, compared to conventional subwoofer designs.

Sub-cardioid dispersion

Force cancellation

Low distortion

Specifications

Frequency response (± 3 db)	40 - 125 Hz	Power handling (cont.)	700 W	Height	600 mm / 23.6"
Nominal dispersion	Sub-cardioid	Mains power	50/60Hz 100 - 240V	Width	600 mm / 23.6"
Continuous SPL	120 db	Connections	2 \times Combo	Depth	300 mm / 11.8"
Nominal impedance	8 Ω		1 \times XLR thru	Weight	21.5 kg / 47.4 lbs
		Drivers	1 \times IEC C14	Enclosure material	Plywood
			2 \times 8"	Enclosure type	Horn
