

Comium 30

Full range point source

The COMIUM 30 is an installation loudspeaker with a form factor that utilizes the boundaries of a room to enhance performance. This ensures high quality audio reproduction in all scenarios in addition to making the cabinet blend into its surroundings. It is large baffle, shallow depth design utilizing a special type of loading technology and drivers to achieve high efficiency and good sound quality an octave lower than what is normally achievable with such small drivers. The COMIUM 30 is also designed to work well within a Power over Ethernet environment.

Full range

Surface mounting

High intelligibility

Low distortion

Specifications

Frequency response (± 3 db)	30 - 20000 Hz	Nominal impedance (front/rear)	2 × 8 Ω	Height	592 mm / 23.3"
Nominal dispersion	900 Radial	Connections	1 × Euroblock	Width	592 mm / 23.3"
Continuous SPL	114 db	Drivers	1 × 1" 1 × 5.5"	Depth	120 mm / 4.7"
				Weight	15.6 kg/ 34.4 lbs
				Enclosure	MDF
				Enclosure type	Transmission line + horn
